

# 3D Target Repair Foam

WEBSITE : [3dTargetRepairFoam.com](http://3dTargetRepairFoam.com)

## Single Use Repair Kit \$ 88.50

Single use premeasured is enough material to repair a medium to large deer shot out on both sides. 1.5 quart and when combined=1 gallon+ of finished foam. Each kit comes with a free mixing tool for use with a high speed electric drill.

## Full Case Repair Kit \$ 395.00

Full case includes 2 gallons of pigmented brown resin (B) and the proportional amount of hardener (A). This amount will repair several targets, depending on how damaged they are, and the size. Anywhere from 5 to 20 targets. Each kit comes with a free mixing tool for use with a high speed electric drill.

1. Remove shot out material.

2. Apply plastic sheet with a staple gun. This will hold the foam in place when poured in.

3. Pour mixed foam material into target. Allow to expand and set overnight.
